

08 S 21 WPV - Molecular Pathogenesis of Bacterial Infections

The WPV “Molecular pathogenesis of bacterial infections” is held in the form of a seminar series. Talks given by the students and summarizing recent literature (‘Journal Club’) are an integral part of each seminar. The topics covered include bacterial adhesion, bacterial invasion, bacterial toxins, bacteria-host cell interactions, and genetics of pathogenesis and virulence.

Dr. Elke Genersch, c/o Institut für Mikrobiologie und Tierseuchen, FB Vetmed.
