Trace elements in animal nutrition

- V -

(1 CP) (max. 10 Teiln.)

n.V.– Dahlem Brümmerstr. 34, Institut of Animal Nutrition

Trace elements play an essential role in animal nutrition. The coursework will demonstrate the importance of trace elements for animals and humans. Aspects to be included are the biological role of trace elements, analytical aspects, disorders of trace element metabolism, diagnostic aspects, toxicity and environmental impact. The students will know the relevant aspects and will have working knowledge in this field.
