

08 G16- S - Quality Assessment in Research: Of Factors and Facts

In this seminar, an introductory overview into quality control of science and its measures will be given. Topics will include the many facets of peer review, different journal categories and the assessment of the contribution of individual researchers. Similarly, the difficulties and advantages of publication through open access venues will be compared to "traditional" publication. The maximum number of participants is 10 and times of the seminar will be arranged upon sign-up.
