

## **08 S29 - Case Discussions in Veterinary Pathology**

Each day of the week at 12:30 pm, all necropsy cases of the day will be presented and macroscopical findings discussed among all participating pathologists. Animals will include all domestic animals, mostly cats, dogs, horses, pigs and cattle, and some wild life species. The seminar is intended for everybody interested in macroscopic pathology. Preferably for beginning or medium-advanced to advanced pathologists in training. A strong veterinary background is highly suggested for participants.
