

Small Animal Reproduction

A group of colleagues is highly specialized in gynecology, andrology, obstetrics and neonatal care of dogs and cats. We provide services such as

- Ovulation Timing
- Examinations in case of disorders of the sexual cycle
- Pregnancy diagnosis
- Semen collection and evaluation
- Chilled and frozen semen
- Semen shipment
- Transcervical insemination
- Examination and support during parturition
- Examination and treatments of puppies and kittens

Usually students of veterinary medicine are with us during the consultations. On a regular basis, we offer courses and seminars for veterinarians and breeders.

Finally, we perform clinical research on different aspects of small animal reproduction.
