

The Institute of Immunology thanks all donors!

We would like to thank all donors for their support and give an update on what has been achieved so far.

In one school, the Bumula Primary School, 6 toilets have been renovated and 6 toilets have been newly built! Thereby, at least the official minimum number of toilets for the total number of students has been achieved. We are very grateful for the support that made this possible! In addition, we have now started the renovation of the classrooms at Bumula and Kapchonge Primary Schools.
